

Technical data

# Magnetite separation module for small hydronic junctions

Magnetic insert for separating ferromagnetic substances in small hydronic junctions. Consisting of: magnetic bar screwed into a thermowell, sludge removal nozzle with ball valve 1/2". Enables sludge removal in pressurised systems.  
 Suitable for: Hydronic junctions 60/50, 80/60, 120/80

Contact certification	
Type	Magnetite separation module for small hydronic junctions
Operating pressure	0/4 bar or 58 psi
Operating temperature	0/+110°C or 230°F
Contact	Sinus North America 321 Shoemaker St Kitchener, ON, N2E 3B3 CANADA
