Maintenance box for magnetite separation

Maintenance box, as optional accessory for magnetite separation. Consisting of tubing with chambers made of black sheet steel S235 JR, sludge removal nozzle and ball valve 1/2" as well as a magnetic bar screwed into a thermowell. For mounting to the boiler return below the maniold. Enables sludge removal in pressurised systems.

Contact certification	
Type	Maintenance box for magnetite separation
Operating pressure	0/4 bar or 58 psi
Operating temperature	0/+110°C or 230°F
Contact	Sinus North America 321 Shoemaker St Kitchener, ON, N2E 3B3 CANADA
