

## Technical data

# Compact manifold

Combined flow and return manifold consisting of rectangular tubing with chambers made of black sheet steel S235 arranged adjacent to one another and separated by sinusoidal parting wall. Pipes configured as threaded and/or flanged connections ANSI 150lbs. All pipes are aligned to the height of the shut-off valves, and can be at the top, side or underneath. Drainage coupling  $\frac{1}{2}$ " for flow and return chambers are provided as standard. The compact manifold is factory pressure tested and primed.

Contact certification													
Type	Compact manifold												
Operating pressure							max. 6 bar (87 psi)						
Operating temperature							max. 0 / +110°C or 230°F						
Contact							Sinus North America 321 Shoemaker St Kitchener, ON, N2E 3B3 CANADA						

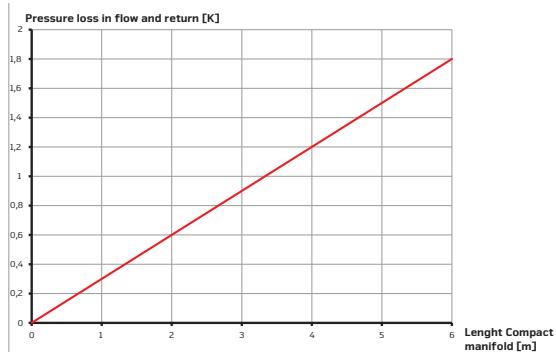

Type	Capacity at $\Delta T$ 20 K		Heating water flow rate		Water content		Heat transfer at 70°/50° C (158°/122°F)			Return increase		Weight basic body		Max. pipe/flange size (boiler connection)		Pipe distance (OC)		Wall thick- ness

Compact manifold 6 bar (87 psi)

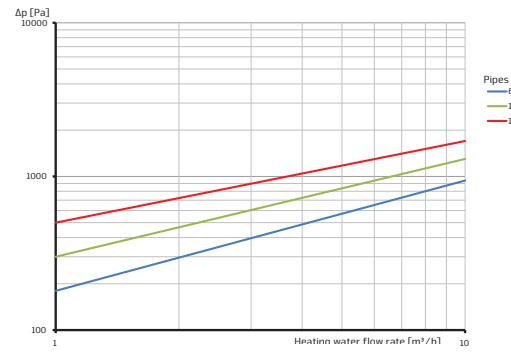

## Heat transfer and pressure drop between flow and return chamber

Heat transfer diagrams illustrating the return temperature increase in Kelvin [K] per meter Manifold length and pressure loss diagrams illustrating the respective pressure drop depending on the water flow rate at given numbers of pipes.

### Type 120/80

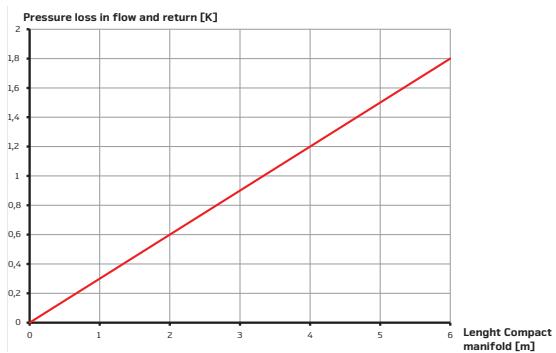

Heat transfer between flow and return

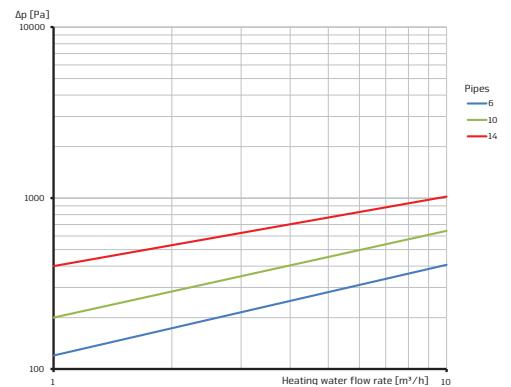

Pressure loss in flow and return

### Type 160/80

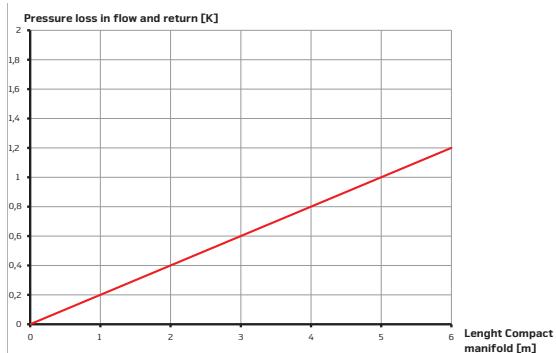

Heat transfer between flow and return

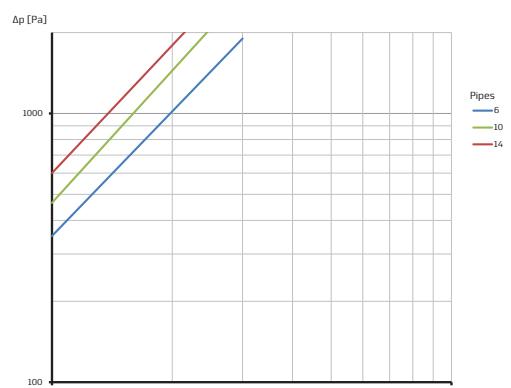

Pressure loss in flow and return

### Type 180/110

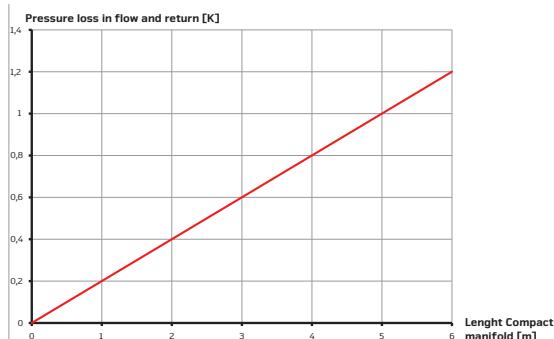

Heat transfer between flow and return

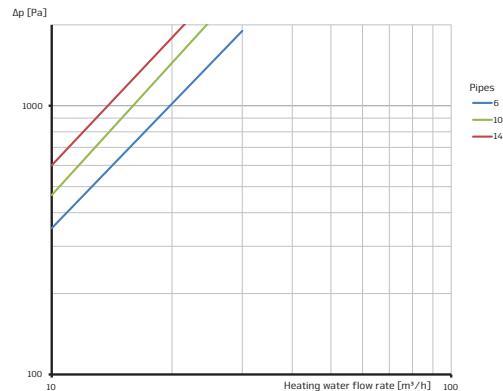

Pressure loss in flow and return

## Type 200/120

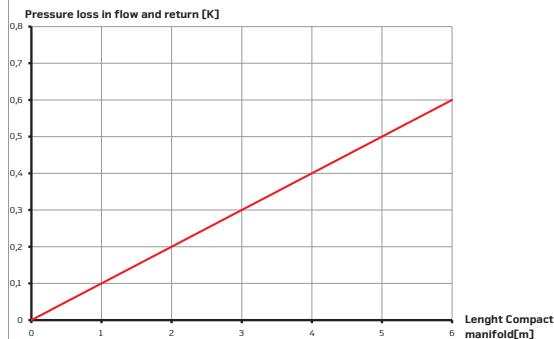

Heat transfer between flow and return

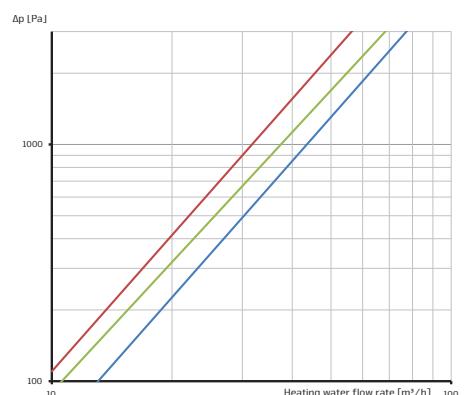

Pressure loss in flow and return

## Type 280/180

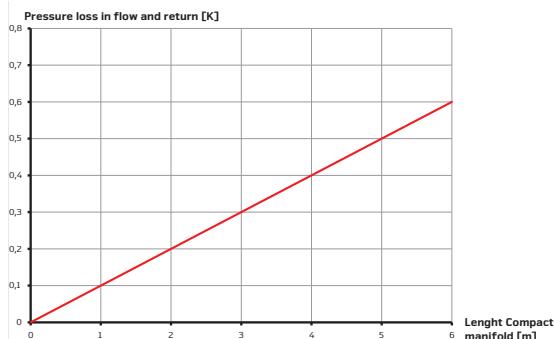

Heat transfer between flow and return

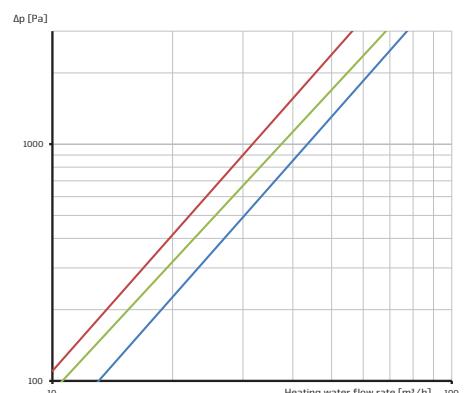

Pressure loss in flow and return

## Type 300/200

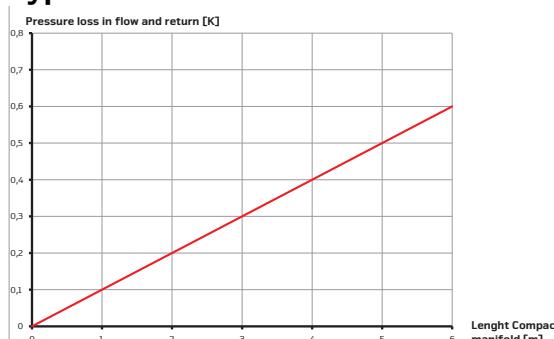

Heat transfer between flow and return

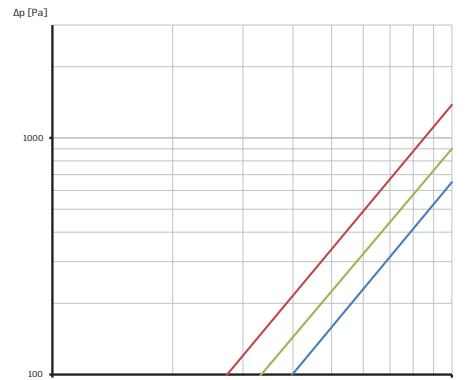

Pressure loss in flow and return

## Type 400/200

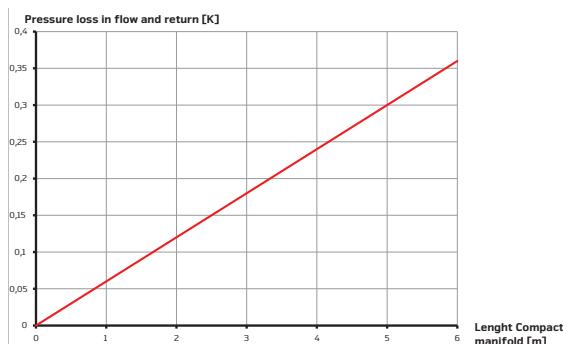

Heat transfer between flow and return

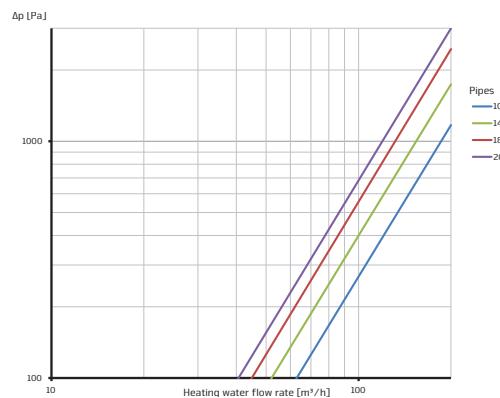

Pressure loss in flow and return

## Type 450/250

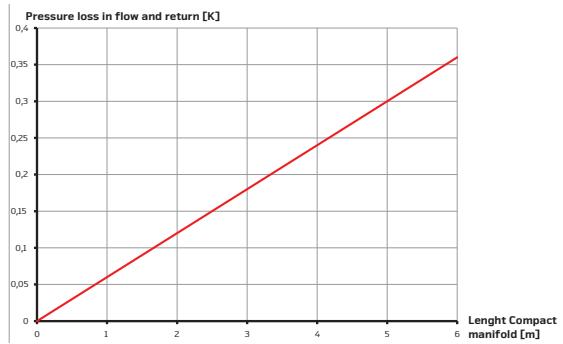

Heat transfer between flow and return

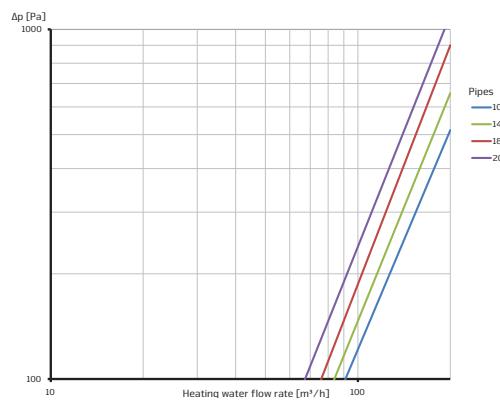

Pressure loss in flow and return

## Type 500/300

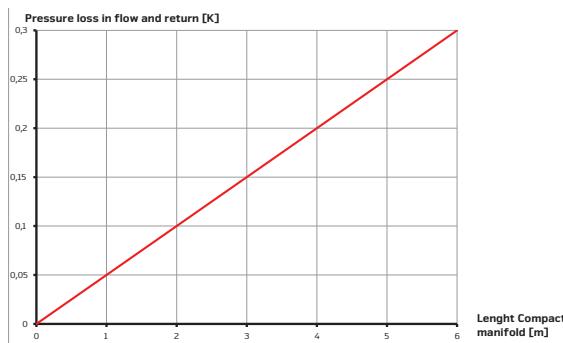

Heat transfer between flow and return

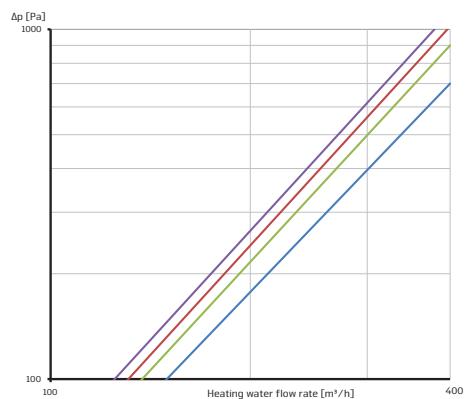

Pressure loss in flow and return

## Type 600/400

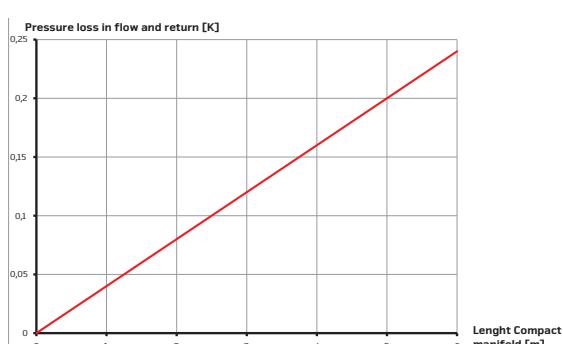

Heat transfer between flow and return

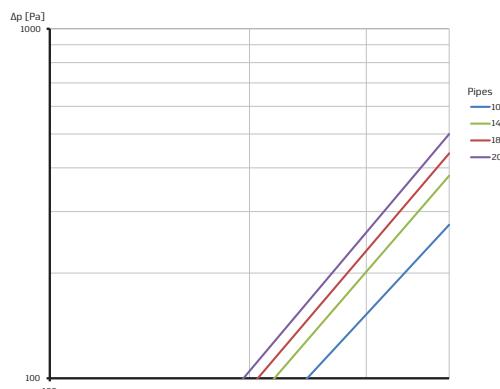

Pressure loss in flow and return

## Type 700/500

Heat transfer between flow and return

Pressure loss in flow and return
